🔄 devgrammer

A recent graduate and fervent about software development. I have gained 2+ yrs of hands-on experience working with the MERN Stack, C++, Python, and Algos. I'm skilled in developing Interactive & User-centered micro-frontend WebApps with an immersive experience. I'm also an avid graphics designing hobbyist. I'm plugging into more roles during my freelancing jobs. Seeking opportunities that combine the skills I'm already seasoned in, ready for developing new skills along the way!
